

## Concentrated degreaser for ultrasonic parts washing

### AQUASOLV Ultrasonic Cleaner (Aqua 20)

#### FEATURES/BENEFITS:

<b>Powerful</b>	Removes oils, greases, dust and dirt
<b>Efficient</b>	Highly concentrated, can be used effectively at low concentrations
<b>Non-caustic</b>	Does not contain nitrites, silicates or phosphates
<b>Non-Flammable</b>	Improves safety profile in the workplace
<b>Specifically Formulated</b>	Cavitates & de-gases easily to maximise ultrasonic cleaning action
<b>Multi-Surface Compatible</b>	For Ferrous & Non-Ferrous metals, plastics, rubber and glass

#### USE:

Ultrasonic Cleaner is used at 2-5% dilution in water and at operating temperatures between 40-70°C depending on soil. It can be used in single or multi-stage ultrasonic cleaning processes.

#### APPLICATIONS:

For use in Ultrasonic Cleaning Baths for the removal of oils, greases, dust and dirt contamination from mixed metals, plastics, rubber, ceramic and glass components. Ideal for maintenance, overhaul and interstage cleaning processes.

#### PRECAUTIONS:

*For further information see MSDS*

#### SPECIFICATIONS:

Form ..... Liquid  
Colour ..... Light brown  
Odour ..... Non descript  
Melting Point..... Undetermined  
Boiling point..... 100 °C  
Flashpoint: ..... Non applicable  
Density (20 °C) ..... 1,1 g/cm<sup>3</sup>  
Miscibility in water ..... Fully miscible  
pH (20 °C) ..... 7
