

Solvent cleaner for industrial adhesives

SPECIAL BLEND Adhesive Cleaner (SB 12)

FEATURES/BENEFITS:

Powerful	Removes cured & semi-cured adhesives including hot melts
Versatile	Can be used manually, in dip tanks or in ultrasonic systems
Substrate Compatible	Suitable for use with all metals and some plastics & polymers
Non-Chlorinated	Contains no chlorines or aromatic hydrocarbons
Low Vapour Pressure	Does not evaporate readily to atmosphere

USE:

Used neat at ambient temperature by immersion or direct application by brush. After removal of contaminant rinse surfaces with water or wipe dry.

APPLICATIONS:

Removes cured and semi-cured adhesives, including hot melts, from floors, machinery, tools and equipment. For use in dip tanks, rag wiping and ultrasonic cleaning processes.

PRECAUTIONS:

For further information see MSDS

SPECIFICATIONS:

Form Liquid
Colour Colourless
Odour Sweetish
Melting Point..... Undetermined
Boiling point..... 171 °C
Flashpoint: 21-55°C
Density (20 °C) 0,94 g/cm³
Miscibility in water Slightly soluble
pH (20 °C) Not applicable
