

Heavy duty graffiti remover for brickwork

De-Solv-it® Graffiti Remover Plus (DSI 6000GRP)

FEATURES/BENEFITS:

Powerful	Removes heavy, old and stubborn paints, inks & graffiti
Industrial Strength	For use porous surfaces such as brick, stone & concrete, and all metals.
No Residue	Fully water rinseable
Convenient	Gel formulation allows effective use on vertical surfaces

USE:

Protect adjacent surfaces. Using a stiff bristle brush, work the gel well into the surface to be cleaned, particularly if porous. Allow the gel to work for 10-15 minutes (longer if particularly old or stubborn graffiti) before washing out, preferably with a pressure washer. Repeat process if necessary.

APPLICATIONS:

For construction and building maintenance operations. A heavy duty gel for removing graffiti on porous surfaces such as brickwork, stone and concrete. The gel formula allows for extended contact times to aid removal of old and stubborn graffiti.

Not suitable for plastics.

Minimum Order Quantities Apply.

PRECAUTIONS:

For further information see MSDS

SPECIFICATIONS:

Form Viscous liquid
Colour Colourless
Odour Mild solvent
Melting Point..... Undetermined
Boiling point..... 200 °C
Flashpoint: >100 °C
Density (20 °C) 1,08 g/cm³
Miscibility in water Emulsifiable
pH (20 °C) Not applicable
