

Product Specification Report

1.0/53216/0418

Dyna High Pressure Machine is a mechanical parts washer, working at a pressure of 24 bar. The machine is equipped with a tube with nozzle, to effectively, safely, quickly and economically clean mechanical parts.

DYNA HIGH PRESSURE MACHINE

Parts washer

A professional high-pressure parts cleaner, for the cleaning of mechanical parts. The use of a heated water-based cleaning liquid used under high pressure in a closed machine, allows for reduced cleaning time and costs (including disposal of used liquid). The operator can work peacefully and environmentally friendly. Because of the closed system, the operator can work safely from the outside, by using the gloves on the front of the machine, without the need for any personal protection equipment. This also means shorter preparation times. The pump is powered via a pedal which allows the operator to have both hands free. The lid can be opened easily and completely, for very easy placing and removal of mechanical parts.

TECHNICAL SPECIFICATIONS

Depth	600 mm
Width	800 mm
Height	1650 mm
Worktop (W x D)	750 x 550 mm
Tank capacity	100 l
Load capacity	50 kg
Working temperature	Up to 50 °C
Heating time	Ca. 1 hour
Weight	90 kg
Power supply	230 V
Pump power	1.2 Kw
Pressure	24 bar
Potenza resistenza	2,0 Kw
Potenza max	3,3 Kw

ISO 9001
BUREAU VERITAS
Certification

N° 206982

All information in this document is based on our practical experience and/or laboratory tests. Due to the multiplicity of conditions for usage and variable human factors, we recommend that you always test our products for suitability prior to use. At any time, this version of the product specification report may have been revised based on legislation, availability of the individual ingredients or newly acquired information. The current approved version is available upon request.
