

Product Specification Report

1.0/99090001/0117

A highly effective antifoam, to use as an alternative to silicone-based defoamers

NO FOAM LP

Silicon-free defoamer

FEATURES:

Easy to use	Can be used undiluted, directly in the tank, or it can be diluted before use.
Silicone-free	Its particular formulation makes this product suitable for all applications where a product without silicones is required, e.g. in the painting sector.
Enhanced formulation	This special formulation is based on organic esters.

APPLICATIONS:

In biological and chemical WWTPs, to break down foam in different phases in tannery, painting cabins, paper and glue production and textile industry.

SPECIFICATIONS:

Form Liquid
 Colour Amber
 Odour..... Characteristic
 Density (20°C) 0,91 g/cm³
 Miscibility in water Fully miscible
 pH (undiluted) ± 6
 Shelf life 6 months
 Viscosity 200-400 cps

ACTIVE INGREDIENTS:

- Fatty acid esters
- Ethoxylate derivatives

INSTRUCTIONS FOR USE:

Can be used diluted as well as undiluted. It is recommended to dose the product at the point with the most turbulence, before the foam is formed. The concentration of the product in water should be between 10 and 300 ppm.
 In case of foam that has already been formed, spray the product directly on the foam.

PRECAUTIONS FOR USE:

For more information consult the MSDS.

All information in this document is based on our practical experience and/or laboratory tests. Due to the multiplicity of conditions for usage and variable human factors, we recommend that you always test our products for suitability prior to use. At any time, this version of the product specification report may have been revised based on legislation, availability of the individual ingredients or newly acquired information. The current approved version is available upon request.
