

# KEMOX

## Powerful concentrated cleaner

- Kemox is a powerful concentrated cleaner used to remove grout, rust deposits and excess cement.
- Kemox also removes lime, lime scale and algae.
- Water soluble.
- Kemox contains a special additive that makes it much less corrosive towards metal than other normally used acids.
- Can be used outdoors and indoors, in areas with normal ventilation.
- Treated surfaces look like new.
- Surfactants are over 90% biodegradable.

### USE

Construction, finishing masonry work, tile retailers, brick manufacturers, swimming pools, assembly plants, plumbing and sanitary facilities, farming and agriculture, maintenance companies, residential housing.  
In general – every place where lime scale build-up, cement deposits and/or light oxidation poses a problem.

### INSTRUCTIONS FOR USE

Use Kemox with a brush, in a sprayer or for soaking.  
In most cases, Kemox is used diluted in water.  
In order to compensate for absorption in bricks, it is necessary to moisten dry walls before application.  
Work from bottom to top so as to avoid streaking, and then rinse with water. Repeat in case of heavy soiling.

### NOTES

Always carry out a spot test first. Do not apply to galvanised surfaces, zinc, magnesium, hard plastic (Formica), certain types of chrome, stainless steel.  
Always rinse the surface well after use. Consult our safety sheet for more information.

### PROPERTIES

Type: Acid cleaner  
Colour: Blue  
Scent: Cherry  
Density: 1.05 g/cm<sup>3</sup>  
pH: < 1
